Soaring like a 'hai-o'...

- **BUY maintained.** Ascribing a 9.8x forward PER to CY06 EPS of 17.6sen, we arrive at a new target price of RM1.73 for Hai-O (means seagull in Mandarin), reflecting an upside potential of 24.5% from its current price of RM1.39.
- **Divestment of non-core businesses a blessing.** Management has divested its non-core businesses. Without these loss-making units, we believe that Hai-O is able to achieve a net profit growth of 23.6% to RM12.2m or EPS of 18.5sen for FY07F.
- Charging ahead in the MLM business. Despite stiff competition in the MLM business, we are confident that Hai-O will continue to soar ahead in its MLM division. This is attributable to its quality range of merchandise as well as high payout rate for its distributors, which in turn will motivate individuals to boost sales.
- Rewarding shareholders. On 7 March 2006, Hai-O rewarded shareholders 1 share dividend for every 20 ordinary shares held. An upward dividend trend is observed from FY03 to FY06, ie from 4 sen to 8 sen. Hai-O's dividend payout policy of at least 50% garnered for the year shows its commitment in rewarding shareholders. We anticipate a GDPS of 10sen for FY07, translating into a dividend yield of 6.9% based on current price of RM1.45.
- Going forward. Going forward, we anticipate a minimum 10%-15% growth for Hai-O in the next couple of years. Much attention has been given to the benefits of consuming traditional medications and food supplements recently. We expect consumers to turn to well-established brands such as Hai-O for quality and genuine products. Hence, we are optimistic on the earnings growth prospects of Hai-O, especially if its planned venture into the Middle East, Indonesia and Singapore market turns out successfully.

PREAMBLE

We visited Hai-O recently and discussed with management on its latest developments and growth potential of Hai-O.

BUSINESS DEVELOPMENTS

Maintaining its position in wholesaling, retailing and MLM

Venturing into Chinese tea business

After more than 30 years of business presence, Hai-O is still going strong, maintaining its position as one of the market leaders in wholesaling, marketing and MLM divisions. Its forte lies in the marketing of traditional Chinese medicines, health care and consumer products.

Hai-O has recently made foray into Chinese tea business as it sees great potential in the global tea business. Equipped with more than ten years of experience in marketing the tea business, Hai-O is determined to gain a prominent foothold in marketing PU-ER tea, the star among all tea products in China. It has recently secured the sole distributorship from a large and established Pu-Er tea producer in Yunnan Province.

Pu-Er tea to shine in the future

The group has made PU-ER tea as one of its core products and plans to expand its business of this unique tea in the next few years. For FYE4/06, Pu-Er tea has contributed RM1.5m to Hai-O's PBT of RM15.7m, ie approximately 10% of the group's total PBT. PU-ER tea is the only tea in the market that improves in flavour as it matures and ages, just like good wine. The discovery of this fact has led to a surge in interest by investors and consumers for this product. Malaysia's climate is favourable for the fermentation process of PU-ER tea, thus aiding Hai-O's effort in cementing the foundation for a proposed tea trading centre in Malaysia.

Strengthening of ringgit is beneficial to the group

Hai-O's products and raw materials are mainly sourced from China in US dollar. Hence, any strengthening of ringgit, say 5% would lower the cost of sales, and would subsequently increase the profit margin of Hai-O's products by approximately 3%.

Plans to spread wings to Indonesia and Singapore Currently, Hai-O does not have MLM business presence in Singapore and Indonesia. Therefore, the group is exploring the idea of spreading their MLM wings to those two countries.

Halal certification provides an edge Hopes to tap into Middle East market

The halal certification obtained for Hai-O's products enables Hai-O to have an edge over other Chinese traditional medicine and supplements products sellers. The confidence brought about by the halal certification helps explain why more than 90% of its products channeled through MLM are purchased by the non-Chinese community. Besides, armed with the halal logo on its products, Hai-o plans to tap into the Middle-East market.

Rebranding exercise and promotion of loyalty card continues

Hai-O will continue to press on its accelerator in brand-building exercise as well as fine-tuning its range of goods in order to boost sales. Its loyalty card programme, which entitles its members to enjoy 5%-20% discount on certain products from its retail outlets currently, attracts more than 100,000 members.

Lucrative payout rate to boost agents' sales for MLM

The group is aware that the effort by MLM's agents is vital for its growth. Hai-O has one of the most attractive payout rates in the MLM business in Malaysia. Having a high rate would boost agents' motivation in marketing its MLM merchandise. A diligent team of agents would minimize adverse competition in the MLM business these days and consequently, enables Hai-O's topline growth for the MLM business at an envisaged rate of 10% for the next three years.

Divestment of non-core business will improve profits

The group has completed its divestments of loss-making non-core businesses and retailing outlets. This would thus enable Hai-O to concentrate on its focal divisions such as wholesaling and MLM in order to realize our projected three-year CAGR growth of 10%.

3-5 new outlets in 12 months

A total of three to five outlets, costing circa RM100,000 each are to be set up in strategic places of Peninsular Malaysia. Hai-O is exploring the long-term viability of running integrated health food store and TCM (Traditional Chinese medicine) clinic in retail outlets. We laud this movement as we believe that this would enhance the value of what Hai-O has to offer in its retail outlets and attract more customers.

Dividend payout ratio of at least 50%.

Hai-O has expressed its commitment in rewarding its shareholders by having a dividend payout ratio of at least 50% for each financial year. Besides, it is also looking into declaring interim dividends as well. We are optimistic that Hai-O is able to declare a total GDPS of 10 sen for FY2007 on the back of 23% growth in bottomline and its net cash position of RM8.7m as at 30 April 2006.

Considering interim

REVIEW OF FY2006 FINANCIAL PERFORMANCE & PROSPECTS

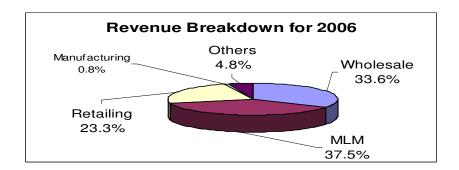

Healthy growth in financial performance, improved turnover

In the financial year ending 30 April FY06, Hai-O enjoyed a commendable 79% growth in net profit supported by a 3.6% growth in turnover. The higher revenue was attributable to effective marketing strategies which focused on promoting branded healthcare and housebrand products in wholesale and retailing divisions, as well as the relentless effort demonstrated by the distributors in the MLM business.

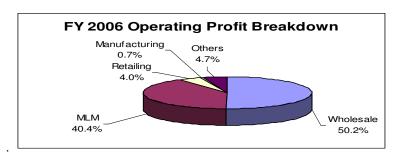

79% y-o-y leap in net profit

Higher margins from sales of branded healthcare products in wholesale divisions, coupled with the divestment of loss-making non-core businesses contributed positively to the escalation in net profit for FY06.

Rosy future growth

We envisage a bottomline growth of approximately 15% for Hai-O in the next couple of years, supported by the MLM and wholesale divisions. From our perspective, the advertising and rebranding exercise by Hai-O will bear fruits soon.

Problems of fake medicine pose vast opportunities for Hai-O

Cases of patients suffering from the misuse of fake traditional Chinese medicines and supplementary products have caught the attention of the media recently. We are of the view that consumers will most likely shift their preference to more reliable manufacturers and distributors of traditional merchandise such as Hai-O in order to avoid suffering the adverse effects of fake medicines. The goodwill and brand name of the 31-year-old Hai-O would definitely be able to gain consumers confidence, hence increasing its sales in the long run.

Net cash position maintained with a GDPS of 10sen

Due to lack of major investments, we believe that Hai-O is able to maintain its net cash position for FY07, forecasted to be approximately RM15.0m. Total FY07 anticipated GDPS is 10sen, translating into a decent yield of 6.9% based on the current market price of RM1.45.

En route to main board transfer next year

Hai-O is confident its net profit for FY2007 would enable it to submit for an application to transfer to the main board by end-2007. It would serve as a price catalyst for Hai-O next year as well as enhance the reputation of Hai-O among the investment fraternity.

VALUATION & RECOMMENDATION

Ascribing a CY06 PER of 9.8x for CY06EPS of 17.6sen, we arrive at a target price of RM1.73 for Hai-O. The target CY06 PER represents a 45% discount to Amway's CY06 PER of 17.9. We opine that the large discount is warranted due to the reasons stated below:

- Hai-O's significantly smaller capitalisation;
- Hai-O's lower PBT margin and ROE
- Hai-O's lower gross dividend yield
- Amway's strong international brand name.

Our target price of RM1.73 represents a 24.5% upside potential. Hence, a BUY is recommended due to Hai-O's anticipated praiseworthy FY07 EPS of 18.5sen, forecasted GDPS of 10.0sen and net cash position of RM8.7m as at 30 April 2006.

COMPARISON TABLE

				CY06						Operating
